Dr Manoj Singh is in Apollo Hospitals as a Consultant Chest and Critical Care Specialist in Apollo Hospital since Dec 2005.

After doing postgraduation in Respiratory Medicine from BJ Medical College (DTCD,MD), he also cleared Diplomat of National Examination (DNB) in Respiratory Medicine. After a brief period in Apollo Delhi in 2003, he did his Critical Care Fellowship (NBE) from Manipal Hospital Bangalore.

He is Regional Faculty for American Heart Association for conducting AHA led CPR courses in Western India.

He is the President Indian Society of Critical Care Medicine Ahmedabad Branch since 2014 onwards and Zonal Member for ISCCM (2014-2016)

He is also faculty in National Chest and Critical Care Conferences.

He is Teacher for Indian Diploma of Critical Care Medicine (IDCCM) and Indian Diploma of Critical Care Nursing (IDCCN) at Apollo Hospital International Ltd under which he has 9 seats of post MBBS/MD/Diploma. He is also the teacher of Indo-Australian Critical Care Fellowship (FCCCM) which is a 2 year Critical Care Fellowship post MBBS (with 2 years of experience)/MD.

In Critical Care, his areas of interest are Multi-organ failure secondary to any acute cause, polytrauma patients needing immediate resuscitation or anticipated long term monitoring and therapy, Acute respiratory failure (especially ARDS, COPD, Asthma), Renal replacement therapy, Poisoning, Post surgical management, Weaning from ventilatory support.

He is actively involved in Critical Care Nursing Education, is a member of Infection control committee, Morbidity and Mortality Committee and Hematology Committee.

Apart from Expertise in Critical Care, he also has expertise in Interventional Pulmonology (Bronchoscopy, Thoracoscopy, Percutaneous Tracheostomy and Endobronchial Cautery for large airway lesion). He organized Gujarats' First Conference in Trends in Interventional Pulmonology in April 2012. He has various papers, presentation and posters in National Conferences' to his credit and one International Publication.

He has also done Large airway tumour debulking, dealt with benign conditions of large airway and placed airway stents. . He has done more than 300 Percutaneous Tracheostomy in complex critical patients on ventilator. He routinely does thoroscopies for undiagnosed pleural effusions. Interventional Pulmonology is a newly emerging field in India which has a vast majority of patients which suffer due to lack of expertise/resource in Indian Setup.

He has various National & one International Publications in the field of Chest & Critical Care. He has conducted many CMEs and Workshops in Critical Care in Gujarat for Doctors and Critical Care Nursing. He is one of the Directors of Spectrum Critical Care and Spectrum Medical Education which is the Largest Pulmonary and Critical Care Clinical group and American Heart Association authorized training Centre respectively.

Society of Pulmonary, Emergency, Critical Care and Trauma
